**R.No.440/L/2019/CWA/Tvl/M-154, Dated:30.07.2019.**

**Sir,**

**Sub:** Report on Examination of water sample from  
Koottalumoodu Arulmigu Bhadreswari Devasthanam  
School, Painkulam, Nagercoil, Kanyakumari, Collected  
on 16.07.2019.

\*\*\*\*\*

A sample of water stated to have been collected on 16.07.2019 from the HDPE tank at Koottalumoodu Arulmigu Bhadreswari Devasthanam School, Painkulam, Kanyakumari District (Source: Open well) by Thiru.T.Thulasidhas, Joint Secretary, was received at this laboratory on the same day from the addressee to assess its suitability for drinking purpose.

The results of analysis are furnished overleaf.

The sample of water is Colorless and clear in physical appearance.

Judged by the results of analysis, it is of satisfactory Chemical quality for drinking.

But it is of very poor bacteriological quality as evidenced by the presence of coliform organisms.

It is to be mentioned that supplying of drinking water without chlorination is not a hygienic practice and it may leads to water borne diseases.

Hence, it is advised that the water drawn from the Open well should be disinfected in the Sump/Tank by using 20ml of 4 to 6% Sodium hypochlorite solution per 1000 litres of water, with half an hour contact time, so as to leave a chlorine residual of 0.5mg/l in the consumer tap to ensure hygienic safety of drinking water.

The Sump/Tank should be cleaned at least once in a month with strong bleaching powder solution to ensure hygienic safety at all times.
